

Blood Circulation Pathway

This chart illustrates the full-body blood circulation system, highlighting oxygenated (red) and deoxygenated (blue) blood flow, with detailed focus on pulmonary, heart, kidney circulations, and capillary exchange zones.

Pulmonary
Circulation

Renal (Kidney)
Circulation

Systemic
Circulation

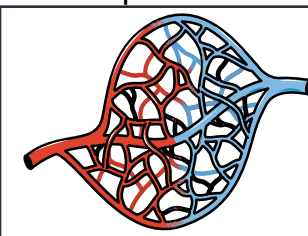

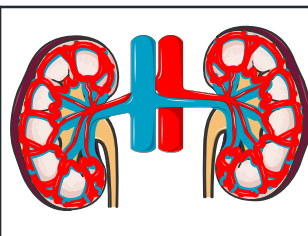

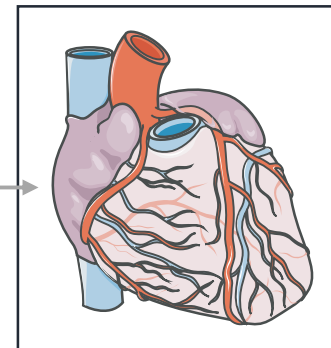

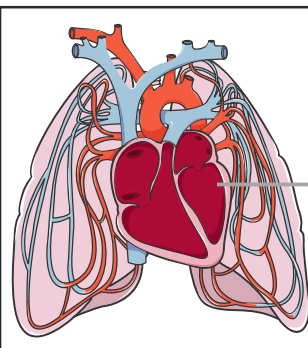

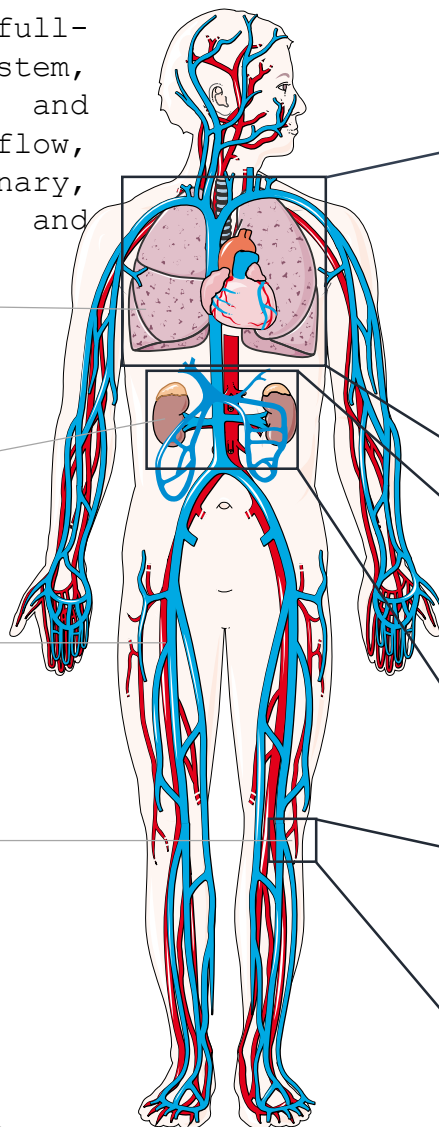

Capillary
Exchange Zones

Pulmonary circulation

Heart circulation

Kidney circulation

Capillaries

 Oxygenated Blood — Blood rich in oxygen, flowing from lungs to body tissues

 Deoxygenated Blood — Blood low in oxygen, returning from body tissues to lungs
